The Advanced Sales Tax Framework

Step By Step Guide Book to
Deploy the ASX Package

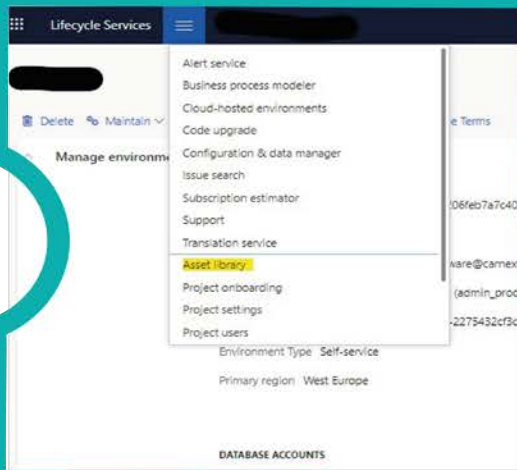

WWW.QUANTUMOMEGAGROUP.COM

STEP 1: Download the package shared by the QD team and store the deployable package at some specific location.

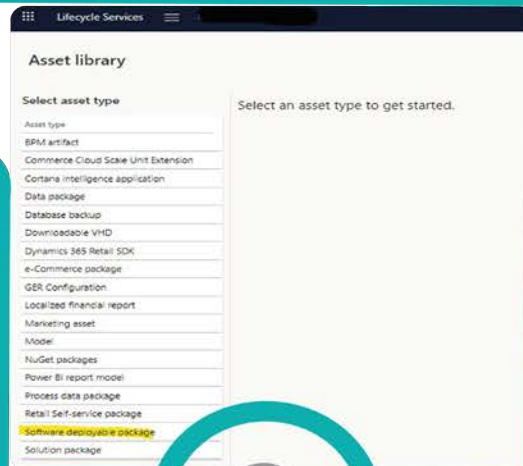

1

2

STEP 2: Login to LCS and go to the Asset library (marked in yellow) as shown in the screenshot on the left.

STEP 3: Go to the software deployable package (marked in yellow) as shown in the screenshot on the right.

3

4

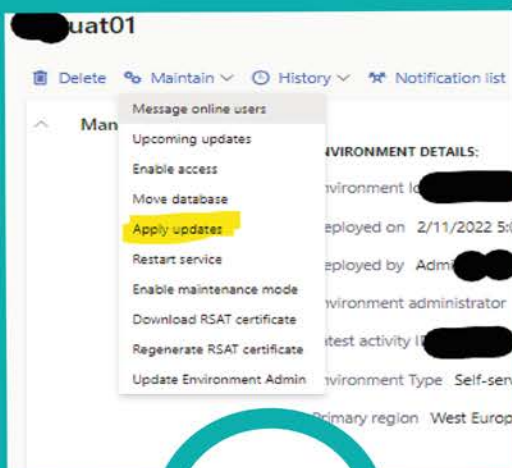

STEP 4: Click on the +(plus) sign (marked in yellow) as shown in the screenshot (left below) to add the QD deployable package.

5

STEP 5: Upload the QD deployable package by browsing the location and click confirm as shown in the screenshot on the right.

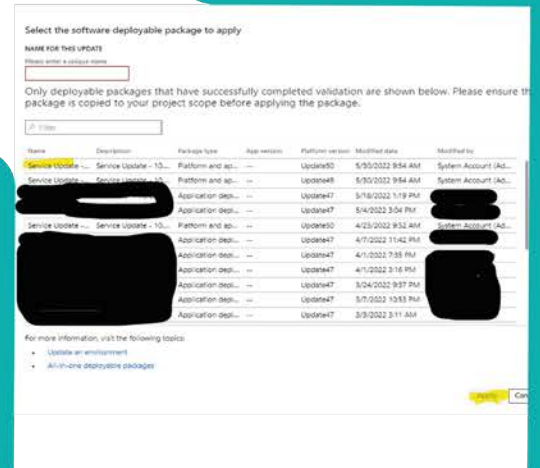

6

STEP 6: Go to the environment in LCS where the ASX deployable package has to be deployed as shown in the screenshot on the left and click on Maintain, then click on Apply updates.

STEP 7: The ASX package which was uploaded in step 5 will be shown here, please select the package and click apply.

7

8

STEP 8: Once the Apply button is clicked, the package deployment will be initiated and the environment will not be accessible until deployment is completed.

STEP 9: Usually it takes 2-3 hours to deploy the package.
